YOUR STORY IN THE STARS

What a generous sky you were born under. A Leo Sun beside lucky Jupiter is a rare, warming signature — confidence that brightens a room rather than crowding it, and a gift for making others feel better than they did a moment ago. Life tends to answer that warmth with opportunity.

Your Taurus Moon is the steady ground beneath the light: soothed by simple, beautiful things, and generous with that same steadiness. Aries rising with Saturn gives courage that also keeps its promises — the combination that quietly builds a remarkable life.

Mercury in Cancer thinks with the heart in the room; Venus in Virgo loves through careful attention; Mars in Gemini keeps you curious and quick; and a Cancer Midheaven points your path toward work that shelters and gathers people in. A bold, kind-hearted builder with real luck in the tank — keep saying yes to what lights you up.
